

THE CHALLENGE OF EVOLUTION  
(Genesis 1:1 - 2:4)

II. Problems for Naturalistic Evolution

B. Biological evidence

1. "Gradualism" doesn't work—slow changes in single steps

-----

2. "Punctuated Equilibrium" doesn't work—\_\_\_\_\_ change  
by \_\_\_\_\_

a. No \_\_\_\_\_ to \_\_\_\_\_ sudden changes

b. Would have to occur in \_\_\_\_\_ populations

c. Would have to be \_\_\_\_\_ of such leaps

3. "\_\_\_\_\_ " doesn't work—  
inexplicable \_\_\_\_\_ change

4. "Cooperation and Symbiosis" doesn't work—organisms working  
\_\_\_\_\_ for \_\_\_\_\_

5. "Complexity Theory" doesn't work—\_\_\_\_\_ systems

6. "Seeding from \_\_\_\_\_" doesn't work—earth life came from  
\_\_\_\_\_

a. No mechanism for \_\_\_\_\_ of life naturally

b. Would require sophisticated \_\_\_\_\_ to do so  
intentionally

c. Does not \_\_\_\_\_ origins, merely \_\_\_\_\_ it

7. " \_\_\_\_\_ " doesn't work— \_\_\_\_\_ learn to create life and travel \_\_\_\_\_ to start the

process

C. \_\_\_\_\_ evidence

1. \_\_\_\_\_ for random production of life too \_\_\_\_\_

2. \_\_\_\_\_ in \_\_\_\_\_ system are too numerous

3. \_\_\_\_\_ in current system too \_\_\_\_\_

III. Predictions of the \_\_\_\_\_ Model

A. Complexity evidencing \_\_\_\_\_ as created by \_\_\_\_\_

B. Evidence of gradual \_\_\_\_\_ of \_\_\_\_\_ due to the \_\_\_\_\_

C. Evidence of widespread \_\_\_\_\_ from the \_\_\_\_\_

D. Evidence of \_\_\_\_\_ among diverse \_\_\_\_\_

E. Evidence of significant \_\_\_\_\_ among diverse peoples

IV. The Factor of \_\_\_\_\_

A. Belief in \_\_\_\_\_ is a \_\_\_\_\_ faith

B. Belief in \_\_\_\_\_ is a \_\_\_\_\_ faith

1. The facts don't \_\_\_\_\_ the biblical account of \_\_\_\_\_

2. The facts show the \_\_\_\_\_ of any evolutionary hypothesis

3. The biblical record is the \_\_\_\_\_ coherent model for the origin of life that is \_\_\_\_\_ with the observable data
